

**WS 6C.1 - Relations**

For each relation, state the domain and range. Then create a table, a mapping, and a graph.

<b>1.</b> $\{(2, 6), (10, 4), (2, -8), (-6, 0)\}$	<b>Domain</b> { } <hr/> <b>Range</b> { }					
<b>Table</b> <table style="margin: auto; border-collapse: collapse;"> <tr> <td style="border-right: 1px solid black; padding: 5px;"><math>x</math></td> <td style="padding: 5px;"><math>y</math></td> </tr> <tr> <td style="border-right: 1px solid black; height: 150px;"></td> <td style="height: 150px;"></td> </tr> </table>	$x$	$y$			<b>Mapping</b> <div style="display: flex; justify-content: space-around; align-items: center; height: 150px;"> </div>	<b>Graph</b> 
$x$	$y$					

<b>2.</b> $\{(-6, 0), (12, 1), (-6, 2), (12, 5)\}$	<b>Domain</b> { } <hr/> <b>Range</b> { }					
<b>Table</b> <table style="margin: auto; border-collapse: collapse;"> <tr> <td style="border-right: 1px solid black; padding: 5px;"><math>x</math></td> <td style="padding: 5px;"><math>y</math></td> </tr> <tr> <td style="border-right: 1px solid black; height: 150px;"></td> <td style="height: 150px;"></td> </tr> </table>	$x$	$y$			<b>Mapping</b> <div style="display: flex; justify-content: space-around; align-items: center; height: 150px;"> </div>	<b>Graph</b> 
$x$	$y$					

<b>3.</b> $\{(8, 2), (8, -4), (8, 0), (8, 6)\}$	<b>Domain</b> { } <hr/> <b>Range</b> { }					
<b>Table</b> <table style="margin: auto; border-collapse: collapse;"> <tr> <td style="border-right: 1px solid black; padding: 5px;"><math>x</math></td> <td style="padding: 5px;"><math>y</math></td> </tr> <tr> <td style="border-right: 1px solid black; height: 150px;"></td> <td style="height: 150px;"></td> </tr> </table>	$x$	$y$			<b>Mapping</b> <div style="display: flex; justify-content: space-around; align-items: center; height: 150px;"> </div>	<b>Graph</b> 
$x$	$y$					

Complete each ordered pair so that it is a solution to  $3x + y = 20$ .

4.  $(2, \underline{\quad})$

5.  $(\underline{\quad}, 5)$

Complete each ordered pair so that it is a solution to  $2x + y = 32$ .

6.  $(\underline{\quad}, 2)$

7.  $(12, \underline{\quad})$

Complete each ordered pair so that it is a solution to  $5x - y = 12$ .

8.  $(20, \underline{\quad})$

9.  $(\underline{\quad}, -7)$
